

Environmentally Friendly.
Competitively priced.
Easy to Switch.

JFC PUMPS Ltd

JFC Pumps are gearing up for the Christchurch rebuild and have some of the most modern and biggest concrete pumps in the South Island. Sizes range from 17 metres to 37 metres, all are for hire, and JFC is happy to organise concrete and placers if required. JFC is proud to be playing a strong part in rebuilding Christchurch. Environmental sustainability is key for any major player taking part in the rebuild and – as such – Tim Johnstone (Managing Director) – have made the decision to switch their diesel supplier to Green Fuels and their environmentally friendly Biogold.

Why did JFC Pumps choose Green Fuels as their diesel supplier?

Tim Johnstone says "We think it is important for businesses to do their bit for the environment. Green Fuels and their Biogold biodiesel offered us a cost effective way to demonstrate our commitment. Green Fuels also supplied us a tank for both of our yards which made it easier for our team to refuel their trucks. We also like to support locals!"
